SIMCONNECT NETWORK WIZARD

If you want to use FS-FlightControl on a computer other than the computer Prepar3D or FSX is running on, the SimConnect Network Wizard will guide you throught everything needed to enable FS-FlightControl to connect to the remote flight simulator computer.

Note: This is only needed if FS-FlightControl is not executed on the same computer as Prepar3D or FSX.

You will find the SimConnect Network Wizard below the folder FS-FlightControl in your Windows Documents folder.

Please first copy all files of the SimConnect Network Wizard to your computer where Prepar3D or FSX is installed and then execute the SimConnectNetworkWizard.exe.

Welcome Screen

🛐 FS-FlightControl: SimConn	ect Network Wizard	-		×
	Welcome to the SimConnect Network Wizard. Thank you for choosing FS-FlightControl! This wizard will guide you through all SimConnect configurations needed to a FS-FlightControl to connect to a remote flight simulator computer. You will need to execute this tool first on the computer running flight simulato Prepar3D, FSX or FSW installed) and second on the computer in your networ want to run FS-FlightControl. We detected following flight simulator version(s) on the current con Please select the one you want to use with FS-FlightControl: Prepar3D v4 Prepar3D v3 Flight Simulator X (FSX)	enable or (with ork whe	re you r.	
<u>H</u> elp	< <u>B</u> ack <u>N</u> ex	d >	Cano	;el

After you started the SimConnect Network Wizard this welcome screen will be displayed.

In case you have more than one compatible flight simulator software installed, please first select which one you would like to use together with FS-FlightControl.

Then please click on the button Next >.

Settings on Flight Simulator Computer

🛐 FS-FlightControl: SimConnect Network Wizard —	
Step 1 of 3: Settings on Flight Simulator Computer	(S)
In this step we will check and update the flight simulator SimConnect settings.	
We detected following local IP address: 192.168.1.165	
Following connection port will be used: 2048 The default port is 2048.	
Update SimConnect Configuration File with These Settings Now Open Port in Windows Firewall	
 Skip this step (if you know how to do it yourself or want to copy the database manually) To build the FS-FlightControl database you will need access to at least (depending on your scenery importwo folders over network: C:\Program Files\Lockheed Martin\Prepar3D v4\ C:\ProgramData\Lockheed Martin\Prepar3D v4\ C:\Users\a-bre\Documents\Prepar3D v4 Files\ C:\Users\a-bre\AppData\Roaming\Lockheed Martin\Prepar3D v4\ 	ts) these
Please create a network share for your whole hard drive: <u>Why whole hard drive?</u> Create Network Share for Hard Drive	
Help < <u>Back</u> Next>	Cancel

On the next screen, the first step in the setup process, all settings on the flight simulator computer are done.

First the local IP address that will be used to connect to the flight simulator computer is being detected.

\times
1

In case there is more than one IP address detected, this dialog will pop up asking you to choose the correct one.

Note: Only in rare cases there will be more than one detected. So normally everything is done automatically and you don't need to select anything here. But if this dialog is shown and you don't know which is the correct one, just try and if FS-FlightControl cannot connect with that, just run the wizard again and change the IP address.

Next the port is shown which will be used for connection.

By default port 2048 is used and you normally don't need to change that. But if this port cannot be used on your system for whatever reason, you can change it here.

Now please press the button Update SimConnect Configuration File with These Settings Now to store these network SimConnect settings. In case a SimConnect configuration exists on the computer already, you will be asked to overwrite it. Please confirm that (a backup copy will be created).

Create Network Share

×

Beside accessing the flight simulator directly via SimConnect, you will also need to build the FS-FlightControl database that contains all the information about airports, navigation aids and so on. To be able to build that FS-FlightControl needs access some flight simulator directories.

Therefore you may create a hard drive network share in this wizard step as well by clicking on the button Create Network Share for Hard Drive.

You can also do that manually if you want and for this case there is an option to skip this part of the configuration although we recommend to let the wizard create the network share automatically.

Change Computer

16.06.2025 23:35	4/7
🛐 FS-FlightControl: SimConnect Network Wizard	– 🗆 X
Step 2 of 3: Change Computer	(3)
All settings on the flight simulator computer are done.	
Please close this wizard now and copy all wizard files (file names start with "SimConnectNetworkWizard") to your computer where FS-FlightControl should be used:	
Close Wizard Now	
IMPORTANT: Copy all wizard files back to your FS-FlightControl computer! Then restart this wizard on your FS-FlightControl computer.	
<u>H</u> elp <	ack Next > Cancel

Now everything is done on the flight simulator computer and therefore it is time to go on with the computer that should run FS-FlightControl.

Therefore please close the wizard now, copy all files to the computer that should run FS-FlightControl and start the wizard there again.

12 Note: It is important that you copy all wizard files to the other computer as they were changed and contain the connection information needed to setup the FS-FlightControl computer.

Settings on FS-FlightControl Computer

🛐 FS-FlightControl: SimConnect Network Wiz	zard		
Step 3 of 3: Settings on FS-Flig	ntControl Computer		Ø
We have successfully updated the Si	imConnect network configuration on the fligh	nt simulator computer.	
Now the only thing left is the remote t	flight simulator folder access.		
Skip this step (if you know how to Remote flight simulator folder acces	o do it yourself or want to copy the database as status: Access failed.	manually)	
Access does not work? Click here for help!	Open Windows Explorer at the "Network" Location		
Search for this computer name in th	ne opened Windows Explorer window: DESK	TOP-39PFDAE	
Then double-click on this name and please enter them accordingly. IMF	I in case Windows Explorer asks you for crea PORTANT: Check "Remember my crede	dentials, entials".	
<u>H</u> elp		< <u>B</u> ack <u>N</u> ext>	Cancel

After you have started the wizard on your FS-FlightControl computer you should directly see this screen. Here we will finalize the configuration on the FS-FlightControl computer.

First please click on the button Enable SimConnect for Remote Flight Simulator Access. This will use all information collected on the flight simulator computer to setup SimConnect on your FS-FlightControl computer. In case a SimConnect configuration exists on the computer already, you will be asked to overwrite it. Please confirm that (a backup copy will be created).

Remote Folder Access

Skip this step (if you kr Remote flight simulator fo	now how to do it yours Ider access status:	elf or want to copy the Access failed.	e database manually)
	Open Windows "Network"	Explorer at the Location	
Search for this computer name in the opened Windows Explorer window: HostName			
Then double-click on this name and in case Windows Explorer asks you for credentials, please enter them accordingly. IMPORTANT: Check "Remember my credentials" .			

As written above already for building the FS-FlightControl database a folder access to your flight simulator computer is required. If you did not skip the corresponding Create Network Share

procedure above, you can make sure now the remote access works.

To check that please click on the button Open Windows Explorer at the "Network" Location and look for the computer name as shown on the wizard page.

Then please double-click on this computer name to access it and in case Windows Explorer asks you for credentials, please enter them accordingly.

Note: It is important that you check the Remember my credentials checkbox as otherwise FS-FlightControl will not be able to access the remote folders.

After the remote folder access was verified the access status should change to Access successful. and you can click on the button Next >.

Note: If for some reason you cannot get the remote folder access to work, please skip this step and build the FS-FlightControl database on the flight simulator computer and manually copy it to the FS-FlightControl computer. Details for that are described in the **database-build** section.

Finish Screen

🛐 FS-FlightControl: SimConn	ect Network Wizard —		×
NNU.	You have successfully finished this wizard!		
	FS-FlightControl is now ready to connect to flight Simulator via SimConnect over ne	etwork.	
	You can now start FS-FlightControl:		
LI SI	Start FS-FlightControl on wizard close		
www.fs-flightcontrol.com			
	Thanks again for choosing FS-FlightControl! Please don't besitete to contact us in case of question		
<u>H</u> elp	< <u>B</u> ack <u>N</u> ext>	Fini	sh

Now all SimConnect configurations are completed successfully and you are ready to start FS-FlightControl! FS-FlightControl Handbuch: https://www.fs-flightcontrol.com/de/handbuch/
