<i>Weather Presets</i> .....	2
<i>Season and Time</i> .....	2

# CONDITIONS MODULE

Define and save detailed custom weather conditions, enable real-time weather, set ILS visibility for all categories and set season, time and simulation rate.

## Current Weather

### image

In this section the current weather is displayed as METAR code and translated text.

You can choose if the translated text it displayed as continuous text or table. Additionally you can decide if all or only official weather METAR data is displayed.

 Note: flight simulator uses the official METAR format, but extends is with additional extensions. FS-FlightControl can decode both, the official METAR data as well as the flight simulator extensions.

You can load the current weather into the **custom\_weather** section or save it as **weather\_presets**.

## Load Theme

### image

Here all themes that are available in the flight simulator are listed and can be activated with just one click.

## ILS Visibility
