STATISTICS

Keep all important graphs on one view including detailed approach graphs and landing report with export and replay functions including Google Earth export.

General Statistics

In this section you get an overview about all important aircraft parameters.

You can click on each of the graphs to show it maximized. Click on it again to revert it to normal size.

Airspeed

The first graph shows the current indicated and true airspeed.

Altitude

Here the aircraft altitude above mean sea level (MSL) as well as above ground is displayed.

Vertical Speed

This graph shows the current vertical speed per minute.

Attitude

And finally here the aircraft attitude is shown as bank and pitch angle.

Recording and Playback

At the bottom left you will find the recording and playback controls.

You can start and stop the live recording of aircraft data at any time. While the recording is stop you can use the playback controls to go through the recorded data easily. If you want to delete all recorded data and start all over again use the button **Clear All Flight Data**.

Import and Export

Additionally you can import and export the flight data from respectively to a CSV file.

Export to Google Earth

###

###

Approach Statistics

After you started an approach in the **Position** module in this section your approach will be tracked.

Approach Details

###

Landing Report

Landing Report

Distance:	677.78 ft.	G-Force:	1.0 G
Deviation:	144.39 ft. left	Pitch Angle:	2.24° up
Vertical Speed:	-717 ft./min.	Bank Angle:	9.63° left
