Same Level Moving 1
Rotation 1
Zoom 1
Reset and External Views 2

VIEW/SLEW MODULE

Control the current camera view and zoom as well as use the aircraft slew mode to move your aircraft exactly to the position you need it.

Camera View

image

The left section in the screen controls the current camera view.

Back to Cockpit

image

First there is an easy way to go back to your cockpit: You can either go back to the virtual cockpit (3D) or the 2D cockpit.

Same Level Moving

image

With the left two buttons you can move the view forward or backward.

The other buttons can be used to move the view to all directions.

Rotation

image

Use these buttons rotate the view left and right or up and down.

Zoom

image

Here you can zoom the view in and out by using two different speed levels.

Reset and External Views

image

Additionally you can reset the current view to its defaults or iterate through all external views defined by the currently loaded aircraft.
