INTRODUCTION

FS-FlightControl is a touch optimized instructor station for all versions of Lockheed Martin Prepar3D®, Microsoft Flight Simulator 2020 and X including Steam Edition, X-Plane version 10.52 or higher as well as Dovetail Flight Sim World.

It is used by flight schools and flight simulation centers, but also provided at a greatly reduced price to the flight enthusiast community.

In case you should have any questions about FS-FlightControl, a new idea or you need a specific feature, please do not hesitate to **contact us**.

FS-FlightControl is very actively developed as you can see in our extensive *changelog* and therefore we really look forward to any comments or new ideas to make our product even better!

Help Icons

Beside the question mark in the *title bar* you will find such little help icons all around in the program.

This allows you to access context-related manual topics directly.
