# Simulator

## Main

The 'Main Settings' dialog box is a window with a title bar. It contains the following fields and buttons:

- Simulator Type:** A dropdown menu with 'Prepar3D' selected.
- Simulator Name:** A text input field containing 'Prepar3D'.
- Simulator Documents Folder:** A text input field containing 'C:\Users\A-bre\Documents\Prepar3D v4'. To its right is a 'Browse' button.
- At the bottom, there are two buttons: 'Activate Simulator' and 'Delete Simulator'.

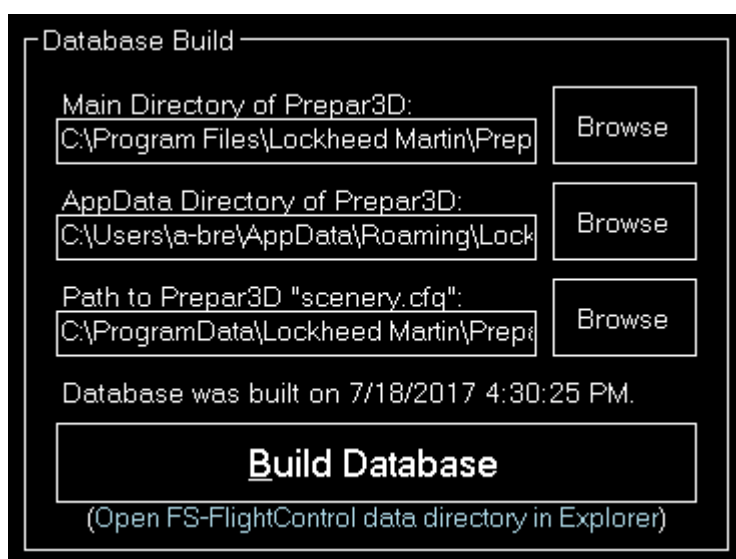

Below the not changable simulator type you can define a custom name for this simulator.

Additionally you can choose the simulator documents folder which is automatically detected if the simulator is installed locally.

If the selected simulator is currently not active, you can use the buttons **Activate Simulator** to activate it or **Delete Simulator** to delete it again.

 **Note:** You can change the active simulator also by clicking on the connection status in the [Title Bar](#).

## Database Build

The 'Database Build' dialog box is a window with a title bar. It contains the following fields and buttons:

- Main Directory of Prepar3D:** A text input field containing 'C:\Program Files\Lockheed Martin\Prep'. To its right is a 'Browse' button.
- AppData Directory of Prepar3D:** A text input field containing 'C:\Users\A-bre\AppData\Roaming\Lock'. To its right is a 'Browse' button.
- Path to Prepar3D "scenery.cfg":** A text input field containing 'C:\ProgramData\Lockheed Martin\Prep'. To its right is a 'Browse' button.
- Below these fields, it says: 'Database was built on 7/18/2017 4:30:25 PM.'
- At the bottom, there is a large button labeled 'Build Database'.
- Below the 'Build Database' button, it says: '(Open FS-FlightControl data directory in Explorer)'.

The database build is explained in the [Database Build](#) installation section.

# Navigation Data Update

This area is explained in the [Navigation Data Update](#) dialog section.
