Database Build

All FS-FlightControl Steam products come with a pre-build database against the latest default simulator scenery.

Therefore no manual database build is needed as long as you do not use any additional scenery DLCs.

Database Build

Database Build

Main Directory of Prepar3D:
C:\Program Files\Lockheed Martin\Prep Browse

AppData Directory of Prepar3D:
Roaming\Lockheed Martin\Prepar3D v4\ Browse

Path to Prepar3D "scenery.cfg":
C:\ProgramData\Lockheed Martin\Prep Browse

Use Nav aids/Frequencies from Navigation Data

Database synchronization not started yet.

Build Database

(Open FS-FlightControl data directory in Explorer)

After you have installed additional scenery DLCs you should rebuild also the FS-FlightControl Steam product database.

All paths should be pre-selected automatically, so just hit the button **Build Database** to start the database build!
