# Database Build

All FS-FlightControl Steam products come with a pre-build database against the latest default simulator scenery.

Therefore no manual database build is needed as long as you do not use any additional scenery DLCs.

## Database Build

Database Build

Main Directory of Prepar3D:  
C:\Program Files\Lockheed Martin\Prep... Browse

AppData Directory of Prepar3D:  
Roaming\Lockheed Martin\Prepar3D v4\ Browse

Path to Prepar3D "scenery.cfg":  
C:\ProgramData\Lockheed Martin\Prep... Browse

Use Nav aids/Frequencies from Navigation Data

Database synchronization not started yet.

**Build Database**

(Open FS-FlightControl data directory in Explorer)

After you have installed additional scenery DLCs you should rebuild also the FS-FlightControl Steam product database.

All paths should be pre-selected automatically, so just hit the button **Build Database** to start the database build!
