# Table of Contents

Database Build

All FS-FlightControl Steam products come with a pre-build database against the latest default simulator scenery.

Therefore no manual database build is needed as long as you do not use any additional scenery DLCs.

Database Build

After you have installed additional scenery DLCs you should rebuild also the FS-FlightControl Steam product database.

All paths should be pre-selected automatically, so just hit the button `Build Database` to start the database build!
