# View/Slew Module

Control the current camera view and zoom as well as use the aircraft slew mode to move your aircraft exactly to the position you need it.

## Camera View

### image

The left section in the screen controls the current camera view.

## Back to Cockpit

### image

First there is an easy way to go back to your cockpit: You can either go back to the virtual cockpit (3D) or the 2D cockpit.

## Same Level Moving

### image

With the left two buttons you can move the view forward or backward.

The other buttons can be used to move the view to all directions.

## Rotation

### image

Use these buttons rotate the view left and right or up and down.

## Zoom

### image

Here you can zoom the view in and out by using two different speed levels.

## Reset and External Views

### image

Additionally you can reset the current view to its defaults or iterate through all external views defined by the currently loaded aircraft.
